E-Waste Business & Investor Guide

1. Types of e-waste startups that attract investors:

A) Precious metal recovery technology

- Extract gold, copper, palladium, lithium using green chemical or automated recovery.

- Successful examples: Attero Recycling (India), Mint Innovation (New Zealand), Li-Cycle (Canada).

B) Refurbish + resale business

- Repair old phones/laptops and resell with warranty.

- Successful examples: Cashify, Reboxed.

C) EV battery recycling

- Recover lithium/cobalt from used batteries.

- Successful examples: Redwood Materials, Attero.

D) Automated dismantling system

- Robotics or automated dismantling.

- Successful example: Apple Daisy robot.

E) Plastic-to-usable material transformation

- Recover e-waste plastics to make 3D printing filament, furniture, panels.

- Examples: Reflow (Amsterdam), Plastic Odyssey.

2. Globally proven ideas you can replicate:

Idea 1: Mini precious metal extraction unit—focus on PCB, smartphones, RAM/CPU.

Idea 2: Micro-collection centres—place e-waste points in shops, colleges, apartments.

Idea 3: Refurbished electronics business—repair and resell.

Idea 4: E-waste plastic transformation—make tiles, panels, 3D filament.

Idea 5: PCB component harvesting—resell salvaged components.

3. Best business model for Ernakulam:

- Start with collection and dismantling.

- Sell high-value fractions (PCBs, copper, batteries).

- Expand later into refurbishing or metal extraction.

- Then seek investors.

4. How to attract investors:

1. Present a scalable idea (Kerala-wide e-waste network).

2. Show strong revenue model (free collection + valuable outputs).

3. Demonstrate early traction (300+ kg per month).

4. Add a tech roadmap (automation, recovery line).

5. Show sustainability metrics.
