Carbon Credits Eligibility Framework: 20 Sectors/Activities in India (tCO_2e)

Indian Carbon Market (ICM) - Compliance (M-CCCs) & Voluntary (O-CCCs/VCUs) Mechanisms | Generated: November 26, 2025

S.No	Generator Type / Activity Focus	Sector(s) of Operation	Credit Generation Mechanism & Sources
1	Cement Manufacturing Units	Industrial Sector	Compliance Mechanism (M-CCCs): Issued to obligated entities that achieve a GHG emission intensity (tCO2e/unit of product) below their prescribed sectoral targets.
2	Iron & Steel Production Facilities	Industrial Sector	Compliance Mechanism (M-CCCs): Units that outperform mandatory GHG intensity reduction targets generate tradable certificates.
3	Aluminium Smelters/Producers	Industrial Sector	Compliance Mechanism (M-CCCs): Over-achievers of GHG intensity targets in this energy-intensive sector.
4	Fertiliser Manufacturing Units	Industrial Sector	Compliance Mechanism (M-CCCs): Obligated entities that surpass their set reduction targets.
5	Petroleum Refinery Units	Industrial Sector	Compliance Mechanism (M-CCCs): Refineries that demonstrate emissions intensity lower than required generate credits.
6	Pulp & Paper Mills	Industrial Sector	Compliance Mechanism (M-CCCs): Companies achieving superior GHG intensity performance compared to the regulatory target.
7	Textile Industry Units	Industrial Sector	Compliance Mechanism (M-CCCs): Units in the textile sector meeting or exceeding mandatory reduction targets.
8	Petrochemicals Plants	Industrial Sector	Compliance Mechanism (M-CCCs): Facilities that successfully reduce emission intensity beyond their compliance obligations.
9	Chlor Alkali Plants	Industrial Sector	Compliance Mechanism (M-CCCs): Units generating surplus credits by over-complying with emission benchmarks.
10	Solar & Wind Energy Projects (Utility-Scale)	Energy Industries	Offset Mechanism (O-CCCs/VCUs): Generation of clean electricity, including large-scale farms and types like Floating Solar PV.
11	Mangrove Afforestation & Reforestation	Forestry / Nature-Based Solutions (NBS	Offset Mechanism (O-CCCs/VCUs): Approved voluntary crediting methodology for carbon removal targeting coastal ecosystems.
12	Sustainable Agricultural Practices	Agriculture / AFOLU	Offset Mechanism (O-CCCs/VCUs): Projects by FPOs or farmers to enhance soil carbon sequestration and reduce methane emissions.
13	Manure Management Projects	Agriculture / Waste Handling	Offset Mechanism (VCUs): Projects to capture methane from animal waste via biogas-based systems.
14	Landfill Methane Recovery	Waste Handling and Disposal	Offset Mechanism (O-CCCs/VCUs): Approved methodology for capturing and destroying methane emissions from solid waste landfills.
15	Community Improved Cookstoves	Energy Demand / Community Develop	Offset Mechanism (VCUs): Distribution of efficient stoves (e.g., Improved Biomass Cookstoves) generating credits with social co-benefits.
16	Green Hydrogen Production	Industries / Energy	Offset Mechanism (O-CCCs): Approved methodology. Designated for future phases of CCTS activation.
17	Small Hydro and Pumped Storage	Energy Industries	Offset Mechanism (O-CCCs): Generation of renewable power, included in approved voluntary methodologies.
18	Industrial Energy Efficiency Projects	Industries / Energy Demand	Offset Mechanism (O-CCCs): Projects implemented by non-obligated entities to improve efficiency.
19	Electrification of Transport/Mass Transit	Transport	Offset Mechanism (O-CCCs/VCUs): Activities reducing tailpipe emissions (e.g., Delhi Metro Rail Corporation (DMRC)).
20	Carbon Capture Utilisation and Storage (CC	Technology / Cross-Sectoral	Offset Mechanism (O-CCCs): Involves physical removal or avoidance of emissions. Designated for Phase II of CCTS offset mechanism.

Color Legend:

- Industrial Sector (M-CCCs)
- Agriculture/Waste (O-CCCs/VCUs)
- Energy/Transport (O-CCCs/VCUs)
- Forestry/NBS (O-CCCs/VCUs)
